

Switch

BUSINESS SOLUTION

OUR STORY

For five years, Switch has provided many services and software solutions in several areas, the most important of which are logistics.

What started in 2016 as service providers with a few resources has grown to over 20 companies and partners in success

At Switch, we believe there is a better way to deliver IT solutions. A more valuable and less invasive way, where customers are earned with quality rather than bought.

OUR STORY

We truly are committed to our customers. That is our foundation. Our success has been driven by our customer-focused approach and commitment to building and maintaining long-term partnerships with our clients. We're proud to say that the majority of our new customers were referred to us by our current clients. And it's been that way since the beginning.

We are a group of technology experts with a broad mix of backgrounds and expertise – this makes us outside-of-the-box thinkers, delivering solutions that are tailored to YOU.

WHY SWITCH

Switch helps clients in pursuit of high performance to optimize their costs and effectively deploy resources, while supporting flexibility and capability for growth.

What separates us from other service firms are values beyond the obvious and the tangible. We believe our desire to exceed your expectations, provide resources best-suited to your company's environment and respect for your processes provide value to you – combined with cost savings, timely deliverables and exceptional quality work. Just about any services firm can provide skilled resources. Our deep commitment to ensure you succeed and our practice-driven approach is what differentiates us. Our full array of services help you to focus more effectively on strategy and core business activities, while improving efficiency on support activities.

SOFTWARE DEVELOPMENT

Switch offers full-cycle software development services. We support various platforms, technologies and integrations in order to ensure our customers' needs are met. We use data as fuel to solve user problems and build practical applications. We use agile development cycles and sprints in order to reduce long deployment cycles.

- **Data Engineering (BI & Big Data)**
- **Front-End Development**
- **Back-End Development**
- **Full-Stack Development**
- **System Integration**

MOBILE DEVELOPMENT

Switch offers full-cycle software development services. We support various platforms, technologies and integrations in order to ensure our customers' needs are met. We use data as fuel to solve user problems and build practical applications. We use agile development cycles and sprints in order to reduce long deployment cycles.

QA & TESTING

Switch supports customers by providing them with QA application testing services to fit their specific needs. We have a dedicated team that delivers end-to-end management of the entire testing suite, combining automated and manual approaches in order to ensure your final product runs smoothly and meets performance, security and functionality standards. Our QA and Testing services help you improve retention, user-conversion and to maximize the ROI of your product.

- **Manual Testing**
- **Load & Performance Testing**
- **Automated Testing**

DIGITAL TRANSFORMATION

Digital Transformation is a journey, it requires a cultural and mindset change, along with a complete analysis and implementation plan. Switch's technology strategy service offers a full analysis providing you with a 360° view of your IT environment, technologies and services currently in use. This is a fundamental part of our Full IT Support offering, allowing you to focus and enhance your business objectives. From cloud strategy to migration, we offer a full end-to-end service supporting you along the way.

- **Cloud Migration**
- **Agile Transformation**
- **AI & Machine Learning**
- **Consulting**
